OSBORN Novoflex-B

The flexible honing tool, by OSBORN,
global leader in brush manufacturing!

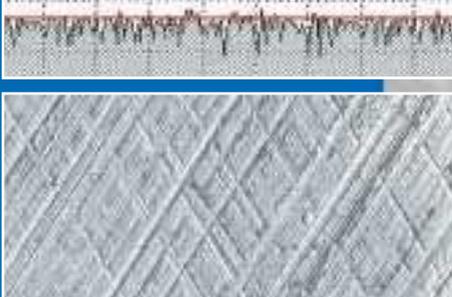

Surface finish of a cylinder bore...

...before Novoflex-B honing

...after Novoflex-B honing

- Sturdy, self-centring system
- Flexible filaments are engineered to provide the correct pressure to create an ideal hone; bore after bore
- Ideal tool to create a min. 60% plateau finish with cross-hatch pattern for an improved oil retention and increased efficiency
- Reduce Ra and Rpk values to achieve a smooth, even surface finish, free of deformed metal, with ideal edge break
- Easy to use automatically or manually
- Grit choices are available in silicon carbide and aluminium oxide from 60 to 400
- Best quality-price ratio
